

Dream Vision Interiors Teams with The Companies of Nassal to Create Immersive, One-Of-A-Kind Entertainment Spaces for Homeowners

ORLANDO, FL (March 24, 2021) – [Dream Vision Interiors \(DVI\)](#), an Orlando-based interior design company that creates amazing, award-winning, fun-filled home entertainment spaces announces today it is teaming up with [The Companies of Nassal](#) – a top-notch fabrication group that specializes in world-class theme park attractions, specialty destinations and experiences. Through this dynamic partnership, the companies will bring to life a world of imagination, fantasy and storytelling with custom-designed, multi-space environments that include game rooms, home theaters, pubs, jazz clubs, hobby rooms, casinos, soda and ice cream parlors and much more.

“This partnership is an amazing opportunity for our clients, as it will allow them to have the same fabrication team who helped create some of the most iconic experiences in theme parks around the world to now create themed environments for their own home,” said Jim Duffy, Vice President and Senior Designer of Dream Vision Interiors. “With Dream Vision Interiors’ story-driven approach to designing the most creative, interactive and immersive environments you can imagine, and Nassal’s team taking those designs from paper to reality, the level of residential entertainment spaces has just entered a whole new level of creativity.”

Dream Vision Interiors’ creative team and project managers will focus on customer relations, immersive and interactive concepts, interior design, staging, prop development (including animatronics), and the overall creative intent and vision for each residential entertainment center. Nassal’s team will take the design from paper to reality and create custom fabricated elements for each individual project. On larger projects, that can also involve substantial remodeling or construction. With this turn-key approach, the team can streamline the process and offer the homeowner more value. The companies will first focus business in Central Florida, with plans to later expand to markets across the U.S.

“The opportunity to partner with Dream Vision Interiors really came at the perfect time,” said Matt Brown, Partner at The Companies of Nassal. “With the shift in the world in 2020, we had been looking to expand our services more into the residential market, and after seeing the creativity and attention to detail Dream Vision Interiors offers its clients, we knew we wanted to collaborate with their talented team.”
